

Rob Beswick

- Star-formation & Accretion history of Galaxies through cosmic time ($z \sim 0 \rightarrow z \sim \text{several}$)
 - Via radio (& multi-wavelength) observations
 - Lead large survey (LeMMINGs) of 300 nearby galaxies with e-MERLIN – studying AGN/starformation and neutral/molecular gas physics.
 - Starformation/accretion at high- z via deep radio continuum surveys and multiwavelength follow-up
 - Next generation radio instruments & techniques
 - + + + +

High redshift AGN in GOODS-N resolved with e-MERLIN
