

Jodrell Bank Internet Observatory (JBiO) 7-m Telescope

Observations Report Form

Name:
Address:

Email:

JBiO Username:
Date Observations Were Completed:

1. In the following table, please give a summary of the observations you did with the 7-m telescope. Include the date and time you performed the observations, the observation type (scan or spectrum), the Galactic coordinates or object name observed, and a brief description of the result (was the observation successful? Did it need to be repeated?).

Date/Time	Observation Type	Coordinates/Object	Result

2. Please indicate the overall result of your observations. Include details about who performed the observations, their level of knowledge (primary, secondary education etc.), whether they found the observing process easy or difficult to follow, whether they understood any exercises performed. What was the scientific output of the observations?

3. Please comment on the overall usefulness of the 7-m telescope in the context of your observations. Can the user interface be improved? Can the online help be improved? Your comments will be used to develop future enhancements to the 7-m telescope system.
