

Castel S. Pietro Terme 1988

2nd EVN Symposium Torun 1994

- 21 October 1994
- Opening of the Torun 32-m on 22 Oct
- 74 Participants
- 23 papers

2nd EVN Symposium and Users' Meeting, Toruń, Poland, 21 October 1994 - group photo

10th EVN Symposium, Manchester 2010

- 20-24 September 2010
- First 6 telescope image with e-MERLIN
- 103 Participants
- 71 talks (+30 posters)

Compare:

- 14 names in common (several from 1994 still around but not here) : Lots of new names

	Torun		Manchester
Astrometry	6		3
Mm VLBI	2		2
VLBI Surveys	3		4
Lenses	2		2
AGN	4		19
Masers	2		7
Stars continuum	-		6
SNR	-		6
Techniques	5		22

Highlights

- Progress in circumstellar physics from line work
- Brown Dwarfs as slow pulsars!
- Renaissance of AGN/Starbursts
- Wide field techniques (→ LOFAR, SKA)
- Black-hole tomography – closure phase signature
- SN1993J still going!

Highlights contd.

- Advances in jet physics: velocities, helical motion
- XRBs – a handle on black-hole spin?
- 10's μ s accuracy in astrometry: new astrophysics
- 7 LOFAR dwarves in a cow pat – who's Snow White?
- New instruments offer exciting possibilities: boom time for radio astronomy – all we need now are the postdocs!
- e-MERLIN 1st Image
